

## A Total Environmental Compliance Solution

GreenSoft Technology is a leading provider of environmental compliance data and software for the global electronics industry. GreenSoft provides a Total Environmental Compliance Solution to help companies comply with environmental compliance requirements such as REACH SVHC, RoHS, China RoHS and many others. We also help companies make sure their products continue to comply, even as components and regulations change.

Our **Data Management Service** collects data on all parts from your BOMs. We match your parts list against our database and contact your suppliers to complete the collection. Anticipate regulatory changes by collecting full material disclosure on every component.

**GreenData Manager-REACH** is a powerful award-winning compliance tool:

- Available in both single desktop and client-server versions
- Manage data collection, compliance validation, substance analysis, and conduct product-level full disclosure
- Provide compliance validation of parts or BOMs for EU RoHS, China RoHS, Halogen-Free, and more
- REACH SVHC reporting on components and BOMs
- Roll-up substance weight or ppm for product-level full disclosure of material composition reporting
- Perform product compliance validation on OEM requirements, such as IBM ES46G3772

### ISO 9001:2008 Certification

GreenSoft is registered to the GB/T19001:2008 idt ISO 9001:2008 Quality Management System standard, demonstrating a dedication to and implementation of a systematic and quantifiable approach to quality-of-service standards through a rigorous auditing process.

### Location

GreenSoft is located in South Pasadena, California, near the center of the Los Angeles metropolitan area. GreenSoft's R&D center and content factory are in Shiazhuang, Heibei, China. We also maintain offices in TaiChung, Taiwan and Bern, Switzerland.
