

CONFLICT MINERALS MODULE

For GreenData Manager Software

Conflict Minerals Rule Requires Detailed Annual Reporting

Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act requires companies reporting to the Securities and Exchange Commission (SEC) to declare the origin of **Conflict Minerals (tin, tantalum, tungsten and gold)** in their products. Even if your company is not publicly-traded, you will likely get requests from your customers to comply.

Conflict Minerals Module for GDM Manages CMRTs

Users of GreenSoft's data services and **GreenData Manager (GDM)** software can manage Conflict Minerals data easily and efficiently.

- Import collected **Conflict Minerals Reporting Templates (CMRTs)**, or let GreenSoft collect and validate CMRTs for you.
- Create high-level **completion summaries** at the company-level or product/BOM-level.
- **Aggregate CMRT forms** from suppliers to create company-level or product-level CMRT forms.
- Generate a **Smelter Analysis Report** to show high-risk smelters or smelters from US Sanctioned countries.

Award-Winning GreenData Manager (GDM) Software

The **Conflict Minerals Module** is an add-on module to GDM software. GDM software is a powerful tool to help you manage compliance data and reporting. Designed just for environmental compliance, GDM software features:

- **Central storage location** for all your component and BOM substance data and documents, compliance reports and regulation requirements.
- **Sorting, filtering, and reporting** abilities at the product-level, product family-level, and company-level.
- **Secure protection** of your BOM-level data.
- Parameters for **27 regulations built-in** to the software, or write your own custom rules.
- **Automatic updates** to regulation parameters when regulations change.
- **Easy integration** into your existing workflow and PLM or ERP system.

CONFLICT MINERALS MODULE FOR GDM

Powerful Conflict Minerals Management Tools

When you install the Module, you'll get access to powerful tools. The **Manufacturer Status** page (right) provides an overview of the number of parts and CMRTs for each supplier that have been collected.

Conflict Minerals - Manufacturers Status

Manufacturers Status
