

Why GreenSoft?

We're the Compliance Experts

GreenSoft has been helping manufacturers manage their compliance data for over 20 years. We leverage our extensive substance databases and established supplier connections to expedite the data collection process.

Hands-on Collection Provides the Highest Quality Data

Our data team follows up with suppliers for clarification and corrections as needed, and our multi-step validation process ensures the data that we collect for you is accurate and complete.

Get Help with Global Environmental Regulations

EU RoHS-2	California Prop 65
UK RoHS	PFAS
China RoHS-2	EPA TSCA PBT
EU REACH SVHC	EU POPs
EU REACH Annex 14	Conflict Minerals
EU REACH Annex 17	SCIP Database
EPA TSCA Section 8(a)(7) PFAS	Canadian Environmental Protection Act (CEPA)
Ozone Depleting Substances	Halogen Free/ Low Halogen
EU Packaging and Packaging Waste Directive	Stockholm Convention POPs
	EU Battery Regulation

Get Started with a FREE Risk Analysis

The first step in demonstrating compliance is to analyze your parts list or BOM. Contact us and we'll provide you with a free BOM Scrub / Risk Analysis.

Some of Our Customers

GreenSoft
TECHNOLOGY, INC.

YOUR PARTNER IN COMPLIANCE

Helping electrical and electronic equipment manufacturers comply with global regulations such as EU REACH, EU RoHS, CA Prop 65, PFAS and more.

Compliance can be a
daunting challenge.

Let us do the heavy lifting.

Our Services

Supply Chain Data Collection and Quality Validation

We collect data from your supply chain and deliver the documentation you need to prove compliance with environmental and chemical regulations, such as **EU RoHS, EU REACH, California Proposition 65, TSCA**, and more. Our expert data team validates the provided data for accuracy and completeness.

Customizable Software for Management and Reporting

Analyze complex chemical data on your parts and products, and effortlessly generate regulation-specific reports with **GreenData Manager® (GDM) software**.

Full Material Declaration (FMD) Database Generation

We collect **FMD data** to establish a materials database for your company that can be used for all regulations, eliminating the need to recollect data when regulations change or new ones arise.

A Proactive Solution for PFAS Compliance

With new PFAS regulations and reporting requirements emerging, ensuring compliance with existing standards while preparing for impending changes can be a complex challenge.

GreenSoft takes a proactive approach to PFAS compliance by **identifying PFAS in your supply chain** so you can meet current requirements including **EPA TSCA Section 8(a)(7)**, reporting requirements in **Minnesota and other US states**, and the **proposed ban in the EU**, and be prepared when new regulations arise.

Award-Winning Software GreenData Manager®

GreenData Manager® (GDM) is a powerful software tool to help you manage compliance data and reporting. Designed exclusively for environmental compliance, GDM can be used in conjunction with our data services or as a standalone solution.

- **Store and manage** your part data and compliance reports in one place
- **27 built-in regulations** (updated when regulations change)
- **Customizable** to requirements or regulations unique to your company
- **Generate reports** at the company-level, product family-level, or product-level
- **Seamless integration** into your existing PLM or ERP system
- **Secure protection** of your data
- **On-Premise** and **Cloud-based** versions available

Simplify Your Conflict Minerals Reporting Process

Adhering to global Conflict Minerals regulations requires a deep dive into your supply chain. This is an expensive, complicated, and time-consuming process.

GreenSoft provides hands-on **CMRT and EMRT collection** and offers **Smelter or Refiner (SOR) validation** to determine the legitimacy and Conflict-Free Status. We'll identify products containing 3TG, Cobalt, Mica, and other minerals of concern and supply the documentation you need to prove your company is in compliance.
